Ideal Wide Tolerance Repair Solution

**NOW
AVAILABLE
UP TO
DN600**

VIKING JOHNSON™

PIONEERS IN PIPE SOLUTIONS

CRANE

BUILDING SERVICES & UTILITIES

The Perfect Partner for Difficult Repairs

UltraGrip products are designed to offer a solution to joining plain-ended pipes and contain an end load resistant mechanism, that grips and seals onto a variety of pipe materials including Cast Iron, Ductile Iron, Steel, PVC and PE. UltraGrip is now available in sizes up to DN600.

Suitable for Shattered Pipe

Flexible Fit

UltraGrip offers the ideal solution for repairing severely damaged, corroded or completely shattered pipes in difficult trench conditions. In repair situations where a pipe section needs to be cut out, the UltraGrip range offers a versatile repair solution for a variety of different pipe sizes and pipe material as a result of the wide tolerance capability of UltraGrip products. Only a few strategic sizes need to be kept in stock to cover many repair or emergency situations.

Ease of Installation

UltraGrip is easy to install on site. The product is pre-assembled to allow for quick positioning over the top and bottom tolerance pipe with reversible captive bolts requiring only a single spanner for tightening. An ideal product to choose when dealing with tricky site conditions such as confined spaces.

For more information and to review technical data sheets on the Next Generation UltraGrip range please see the UltraGrip Wide Tolerance Brochure.

Pipe Materials

Asbestos Cement & GRP pipe materials should not be used with the gripping version of UltraGrip.

See the Ultragrip PE Brochure for further information on PVC & PE installations.

***Note:** Due to the flexible nature of the plastic pipes, a close fit Stainless Steel internal support liner is required when PE Pipe or thin walled PVC is used to make a repair to prevent excessive pipe deformation which can occur when UltraGrip is installed.

**UltraGrip grips and seals on the most corroded pipes
with a design life expectancy of 50 years.**
