

Germany - Memmingen

Maintenance on Water Pipe Network

Next Generation UltraGrip
Stepped Coupling - DN100/DN80

Project

In Germany, for daily repair and renewal of the existing pipe network many utility companies use PE-HD pipe materials. For this project, in Memmingen a FriaGrip (UltraGrip) stepped coupling, utilizes a stainless steel support liner to connect an old grey cast iron pipe sized at DN80 to a new DN100 PE pipe.

Client

Stadtwerke Memmingen

Distributor

Friatec AG, Mannheim
