Special Packaging Requirements? Yes No

If Yes, please provide details below:

Special Documentation / QA Requirements?

e.g. Certificate of Conformity, Hydrostatic Pressure Test etc.

If Yes, please provide details below:

Yes No

Please complete the below specification table for each joint you are enquiring after. If your enquiry is for more than 3 types of joints, please save down an additional enquiry form and continue the additional specification variations on the subsequent forms.

Specification	Example	Joint 1	Joint 2	Joint 3
Quantity	2			
TAG No.				
Pipe Size (DN or ")	DN500 / 20"			
Pipe Material	Ductile Iron ¹			
Face to Face Dimension (mm)	Standard ²			
Flange Drilling	PN10 ³			
Actual Working Pressure (bar)	17 bar			
(psi)	225 psi			
Design Pressure (bar)	25 bar			
(psi)	337.5 psi			
Maximum Working Temperature (°C)	25°C			
Line Media	Raw Water ⁴			
Movement Required:				
Compression (mm)	30mm			
Elongation (mm)	30mm			
Lateral (mm)	5mm			
Tie Rods Required? (Y/N)	Yes ⁵			
Location of Installation	Outside (direct sunlight) ⁶			
Approvals Required	WRAS			
Drawings Required (Y/N)	Yes			

¹ For some pipe materials this does influence the design of the expansion joint. ² Should either be 'Standard' i.e. using the standard joint dimension, or provide the required dimension. ³ Provide flange standard and drilling specification. ⁴ This is used to select the correct material for the rubber arch.

⁵ Is the pipework anchored or are tie / control rods required? ⁶ Where will the joint be installed? e.g. outside in direct sunlight or protected indoors.
